

Introducing... Klüberfood NH1 CH 2-220

Designed with your chain in mind.

Klüberfood® NH1 CH 2-220

Designed with your chain in mind

Food-grade, synthetic high-temperature lubricating oil specifically designed to withstand the extreme application parameters of chains in baking ovens.

For Chains on:

- /// Pita oven
- /// Rack oven
- /// Spiral oven
- /// Tortilla oven
- /// Tunnel oven

H1 NSF Registration

If you've been using a graphite or polyglycol-based lubricant on your chain consider the new Klüberfood® NH1 CH 2-220. Use less product and improve your work environment all while extending the life of your chain.

Results Based on Customer Tests:

- /// Improved working environment:
noise reduction, no smoke
- /// Low residue formation, cleaner chains
- /// Dramatically reduced oil consumption

Results Based on In-house Tests:

- /// Increased wear protection
- /// Low evaporation rates
- /// Reduced residue formation
