Klüber Offers Innovative Lubrication Solution for Cement Applications

Specialty lubricants will be on display at IEEE-IAS/PCA Technical Conference 2010, March 28 – April 1 in Colorado Springs

Londonderry, NH – (February 24, 2010) – Klüber Lubrication, a worldwide manufacturer of specialty lubricants, will showcase three innovative, specialty lubricants for the cement industry at the IEEE-IAS/PCA Technical Conference 2010, March 28 – April 1 in Colorado Springs, CO. The lubricants are Klüberlub[®] BE 41-1501, Klüberfluid[®] C-F 3 ULTRA and Klüberfluid[®] B-F 2 ULTRA.

Klüberlub BE 41-1501 is heavy-duty grease for low-speed rolling bearings subject to high loads. It consists of a highly viscous hydro carbon oil (ISO VG 1500), special lithium soap and particularly effective EP/AW additives. It also contains solid lubricants to ensure reliable operation under starved lubrication conditions. The product is resistant to ageing and protects reliably against corrosion.

Another unique product is the operational lubricant for large girth gear drives, Klüberfluid C-F 3 ULTRA. This product is a lubricant of a new generation, developed specifically for the lubrication of medium-size to large girth gear drives. It provides good adhesion, excellent resistance to high pressure and protection against wear. Klüberfluid C-F 3 ULTRA is fluid grease free of bitumen and raw materials containing solvents, heavy metals or chlorine.

In addition, our Klüberfluid B-F 2 ULTRA is light-colored running-in and correction lubricant for open gear pinion drives, it is a mineral-oil-based product especially developed for

immersion, circulation or spray lubrication. It contains special additives and surface-smoothing solid particles to enhance the running-in process. In the same way, the tooth flanks of drives already in use can be smoothed.

For more information about the lubrication requirements of cement applications, please visit booth 52 at IEEE-IAS/PCA Technical Conference 2010 or the web site at www.klubersolutions.com/cementsolutions.

Klüber Lubrication, a worldwide manufacturer of specialty lubricants, has long been on the cutting edge of lubricant technology. For more than 75 years, we have been committed to providing tribological solutions for our customers, by manufacturing and supplying specialty lubricants for extreme applications. Our lubricants succeed where conventional lubricants fail. Our philosophy of product innovation demands that we work cooperatively with our customers and has earned us the reputation of reliable partner and solution provider. With representation around the globe, and a product portfolio of more than 2,000 standard lubricants, Klüber's products and services are available wherever and whenever they are needed. Lubrication is our World!
