

Klüber Offers Innovative Lubricants for Wind Power Applications

Specialty lubricants will be on display at Windpower 2008, June 1-4 in Houston

Londonderry, NH – (May 27, 2008) – Klüber Lubrication, a worldwide manufacturer of specialty lubricants, will showcase three innovative, specialty lubricants for the wind power industry at the Windpower 2008 trade show June 1-4 in Houston, TX. The lubricants are Klüberplex® BEM 41-141, Klüberplex® AG 11-462 and Klübersynth® GEM 4-320.

Klüberplex BEM 41-141 is an excellent lubricant with a special base oil mixture and a package of additives to cover the differentiated requirements of the individual bearing lubrication points in wind power stations. Klüberplex BEM 41-141 is ideal for highly stressed rolling and plain bearings, and specifically designed for pitch and azimuth bearings (high stresses, oscillations, vibrations), main bearings (low rpms, high stresses, vibrations), and generator bearings (high rpms and temperatures).

Developed as a priming lubricant, Klüberplex AG 11-462 is ideal for large open-girth gear drives and serves as a contrast lubricant for checking the drive's load pattern. Among its many benefits, Klüberplex AG 11-462 offers high load resistance and adhesion as well as superior corrosion protection. In addition, it has the great benefit of being a white solid lubricant.

Klübersynth GEM 4-320 lubricates spur, bevel and worm gears as well as rolling and plain bearings subject to high temperatures and/or frequently alternating service temperatures. Klübersynth GEM 4 saves energy, has a long service life, is miscible with mineral oil, has excellent low-temperature properties, offers good wear protection, has a high scuffing load capacity and

provides low-foam generation.

For more information about Klüber Lubrication's expertise in the wind power industry, stop by the company's booth (2165) at Windpower 2008 or visit the Klüber Web site at

Klüber Lubrication, a worldwide manufacturer of specialty lubricants, has long been on the cutting edge of lubricant technology. For more than 75 years, we have been committed to providing tribological solutions for our customers, by manufacturing and supplying specialty lubricants for extreme applications. Our lubricants succeed where conventional lubricants fail. Our philosophy of product innovation demands that we work cooperatively with our customers and has earned us the reputation of reliable partner and solution provider. With representation around the globe, and a product portfolio of more than 2,000 standard lubricants, Klüber's products and services are available wherever and whenever they are needed. Lubrication is our World!
